

MUHAMMAD HASNAIN

Bachelor of Computer Science

+92-324-1916043 @mh.hasnain.96@gmail.com LinkedIn.com Github.com Wah Cantt, Punjab, Pakistan

SUMMARY

Summary
Motivated and detail-oriented Computer Science graduate student with a strong interest in artificial intelligence and its real-world applications. Experienced with technologies such as Python, TensorFlow, and Scikit-learn through academic and personal projects. Skilled in software development, data analysis, and problem-solving, with a passion for learning and applying emerging technologies. Eager to contribute to innovative projects and grow within a dynamic and collaborative environment.

EDUCATION

Bachelor of Science in Computer Science
University of Engineering and Technology Taxila
11/2021 - 06/2025 Taxila, Pakistan

PROJECTS

AdvanHR - Oman Government - Research Funded Project

- Automating routine HR tasks and data queries via a virtual assistant powered by LLM.
- Providing AI-driven analytics and proactive insights.
- Predicting employee turnover and sales trends for strategic planning.
- Enabling intelligent document processing for efficient data handling.
- Delivering instant employee support through a self-service chatbot.

Face-Mask Detection

- Key Feature:**
- Built a Convolutional Neural Network (CNN) to classify images of people wearing masks and those without masks, using a labeled dataset from Kaggle.
 - Preprocessed the dataset by resizing images, normalizing pixel values, and augmenting data to improve model performance and generalization.
 - Trained and evaluated the model using techniques like transfer learning, fine-tuning, and hyperparameter optimization to achieve high accuracy.
 - Deployed the trained model for real-time face mask detection.

Parking- Space- Occupancy- Detector using Computer Vision.

- This Python script is designed to detect the occupancy of parking spaces in a given video feed. It uses computer vision techniques to analyze each frame of the video and determine whether parking spaces are occupied or vacant.
- It provides real-time updates on the number of vacant and occupied parking spaces.
- Occupancy status is visually represented with bounding boxes around parking spaces and occupancy counts displayed on the image.

LANGUAGES

English Advanced Urdu Native

EXPERIENCE

Machine Learning Developer

Oops Automate

- 10/2025 - 12/2025 Wah Cantt
- Employed as a **Machine Learning Developer**, responsible for building, deploying, and optimizing AI and ML-based systems.
 - Developed an **AI-powered chatbot for Shopify** to handle real-time customer queries and product searches using natural language.
 - Built an **AI chatbot for eBay** enabling **real-time product search** through natural language queries. Integrated **live eBay APIs** to fetch accurate, up-to-date product listings.

Internship Trainee

Bytewise Limited

- 06/2024 - 09/2024 Remote
- Gained experience in cleaning raw data by handling missing values, correcting inconsistencies, and formatting datasets for analysis.
 - Utilized tools like Python, Excel, or SQL for preprocessing tasks
 - Collaborated with experts and peers at Bytewise Limited to drive innovation and foster growth

CERTIFICATIONS

Courses and Trainings

- Supervised Machine Learning: Regression and Classification.
- Training on Azure AI Fundamentals.Training on Azure Cloud Fundamentals.
- Google: Crash Course in Python.
- Use Automated Machine Learning using Aure ML Studio.

SKILLS

Python	C++	Machine Learning	OOP
DSA	OpenAI	Arduino	
Communications			
Research and Problem Solving			SQL
Deep Learning	Data Science	Flask	
HTML/CSS
